

Volcano Report Guidelines

You will be researching and reporting on a volcano for science this month. You will need to choose a volcano that is active, having had some activity within the last 100 years. In addition to the information below which will be included in a written report, you must have a visual display component as well to share with the class.

Information:

Name of your volcano; how was it named?

Location; country, continent, is it a part of the ring of fire?

Type of volcano

Describe your volcano; Unique features, active fumaroles etc.

Eruption and activity history; recent activity, historic eruptions, geographic evidence of prehistoric eruptions.

Types of eruptions, both historic and recent

Human impact of the eruptions; how has the volcano's activity effected surrounding communities and ecology?
